Decision

Tell Heidi[©]

It **collects a smart, tailored clinical history** from patients in the waiting room to **produce a concise summary** for the ED Doctors.

Saves 3 hours

per shift for each ED Doctor!

Demo

Time for the Demo!

The Impact

Reduces ED Waiting Times

Improves Clinical Safety

Optimises Workforce Efficiency

Enhances Patient Experience

Better Triage & Risk Assessment

Auto-Generates Quality Summaries

Next Steps

Expand Tell Heidi to list and **prioritise** the top 3 **differential diagnoses** as part of the summary to the ED Doctor.

Develop Heidi to **extract relevant patient information** directly from **different EHRs** in order to integrate this into the summary.

Anticipate and display **salient** details and information specific to the **specialty** likely to receive the referral.

Integrate with IVR (voice input) to improve **accessibility**.

Thank You!
